Joint Health for Pets®

Lubricates joints. Similar to humans, animals experience the same degenerative effects due to ongoing wear and tear. Joint Health for Pets® is an advanced formula enriched with 19 essential vitamins and minerals that support your pet's joint comfort and flexibility. Beef-liver flavored, it is the only pet care formula that contains Univera's patented compound, Protectin™, shown in double-blind, placebo-controlled, human clinical trials to dramatically improve joint comfort and mobility.

Joint Health for Pets also contains MaxCell™ for maximum absorption as well as glucosamine, chondroitin, methlysulfonylmethane (MSM), and cetyl myristoleate (CMO) that are powerful joint lubricant and repair compounds.

This formulation is veterinarian-tested and recommended.

- Supports total pet health
- Helps lubricate joints
- Aids in regenerating and renewing cartilage

	ITEM
4.3 oz bottle	109130

INGREDIENTS: Tri-calcium phosphate, Beef Liver spray-dried powder, methylsulfonylmethane (MSM), glucosamine sulfate 2KCL, freeze-dried molasses, chondroitin sulfate, vitamin C (ascorbic acid), kelp, Protectin™, magnesium (chelate), zinc (chelate), manganese (chelate), cetyl myristoleate complex, copper (chelate), selenium (l-selenomethionine), pantothenic acid, biotin, MaxCell™, vitamin B6 (pyridoxine hcl), vitamin B1 (thiamine), vitamin K 1%, vitamin B3 (niacinamide), vitamin B2 (riboflavin), vitamin B12 (cyanocobalamin), vitamin A palmitate, vitamin D2 100,000 IU, vitamin E DL acetate, folic acid 10%, chromium (polynicotinate). Contains glucosamine derived from lobster, shrimp and crab.

Suggested Use: Sprinkle on food daily based on weight.

Pet size	Scoops Daily
Under 12.5 lbs	1/4 scoop
25 lbs	1/2 scoop
50 lbs	2 scoops
75 lbs	3 scoops
100 lbs	4 scoops

Older pets showing signs of aging may be given twice the number of daily scoops for 5-7 days to achieve the desired response; then return to normal serving size.

Warnings: We recommend that you check with a veterinarian before giving your pet this product if your pet is taking medications.

Upon reviewing the science behind the development of Joint Health for Pets™, I started Wylie, our Blue Heeler, on it. Within a few days, Wylie started playing for longer periods; she was a happier, more comfortable, and therefore a more active dog! I confidently recommend this product to my clients and colleagues.
